

State Route 80 Fremont Street - Tombstone

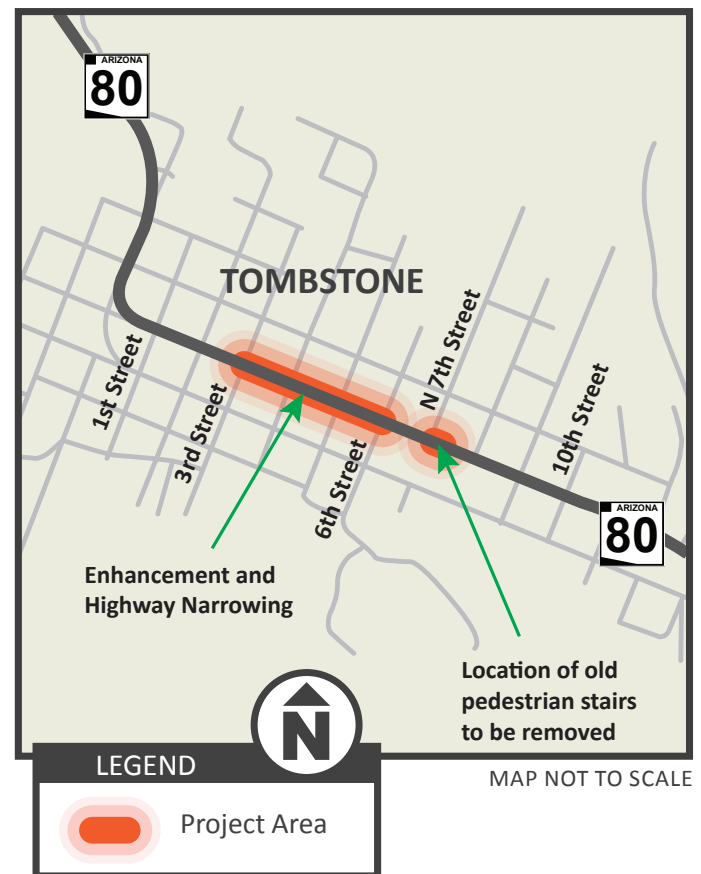

Transportation Enhancement and Safety Project

Project Overview

The Arizona Department of Transportation is moving forward on a project to enhance safety for motorists and pedestrians on State Route 80 in the city of Tombstone and restore some elements along the highway, known locally as Fremont Street, where it runs through the city's historic district. The \$1.1 million project will also include removal of the stairway structures from the old pedestrian bridge that once crossed Fremont Street.

ELEMENTS OF THE PROJECT ARE:

- Construction of some new concrete sidewalks and ADA-compliant ramps.
- Reconstruction of the porch on the city-owned Schieffelin Hall.
- Installation of new non-native landscaping and an underground irrigation system between the new sidewalk and new curb on both sides of SR 80.
- Removal of the functionally obsolete pedestrian bridge, which is located at the east end of the project limits at the old Tombstone High School campus.
- Narrowing the existing roadway from 68 feet wide to 44 feet wide by saw-cutting and partially removing the existing asphaltic concrete roadway.
- Removing and replacing existing pavement in the project area.
- Constructing new curbing, and driveways.
- Replacing, relocating, or removing existing signs to maintain appropriate distance from the roadway.
- Providing continuous street lighting to comply with the Safety Plan.
- Closing driveways not needed by property owners.

Project Schedule

The project is funded through Federal Transportation Enhancement funds, the Federal Highway Safety Improvement Program and state gas-tax dollars. Construction is scheduled for 2015.
